Recipe for 50 cans of Pirate Coke

This recipe will generate 10,000 servings of essential oil favoring, and 25 servings of pirate coke syrup.
One serving is a 12 oz can of soda.
Mixing less than 10,000 servings of essential oil flavor is possible, but you will need more accurate measuring equipment,

Essential Oil Mixture

Makes 10,000 servings, about 73.5mL
Combine the following oils.
Units are in mL, if your tool measures in microliters (uL), multiply mL by 1000.
Example: Fenchol 0.44 mL —> 440 uL

Oil Mix		
lemon oil	33.64	mL
lime oil	26.81	mL
tea tree oil	5.88	mL
Cassia Cinnamon oil	3.31	mL
Nutmeg oil	1.98	mL
Orange oil	0.88	mL
Coriander oil	0.51	mL
Fenchol	0.44	mL
